## -----Summary-----

Detail-oriented Engineer Technician IV with the Nevada Department of Transportation. Prior experience; Nevada Department of Employment, Training, and Rehabilitation, Unemployment Security Division - Adjudication and Call Lobby sections.

## -----Skills-----

|                         |                                |
|-------------------------|--------------------------------|
| Customer Service        | Troubleshooting                |
| Project Coordination    | Conflict Resolutions           |
| Technical documentation | Interview Notation             |
| System diagnostic       | Technical analysis             |
| Compliance auditing     | Federal/State Legal Compliance |
| Quality assurance       | Legal Citation                 |
| Training development    | Technical specifications       |
| Customer interaction    | Product Inspections            |
| Problem solving         | Microsoft products             |
| Critical thinking       | Program support                |
| Effective communication | Product improvement            |
| Data analysis           |                                |
|                         |                                |
| Computer-aided design   | Equipment calibration          |
| 2D and 3D modeling      | Geometric dimensioning         |
|                         | Complex Problem-solving        |

## \-----Experience-----

-

**Engineer Technician IV** | State of Nevada, Department of Transportation  
Carson City, NV | 12/2022 - 01/2026

- Under general direction, incumbents function independently at the advanced journey level performing technical work requiring knowledge of engineering theories, principles, concepts and practices in a specialized area. Incumbents plan and execute assignments, independently

coordinate projects with engineers and other technicians and coordinate engineering functions with the office. Work assignments cover a wide range of technical engineering duties requiring considerable judgment and ingenuity. Incumbents determine individual work priorities and apply established procedures, techniques, standards, process flows, project reporting requirements and guidelines set forth by management. Incumbents perform specialized technical engineering work of an advanced nature and function under minimal supervision; use considerable judgment in making independent decisions; may act as a first-line supervisor and have technical or lead-worker responsibilities for a project and staff of lower-level engineering technicians.

**Unemployment Specialist - Adjudication** | State of Nevada, Dept. of  
Employment, Training, and Rehabilitation | 05-2020 - 12/2022

- Incumbents at this level investigate unemployment insurance benefit claims for the benefits accuracy measurement of benefit payment control program. In the benefits accuracy measurement unit, conduct systematic review and verification of all aspects of unemployment insurance claims to ensure compliance with State and federal laws; interview claimants to verify identification and alien status; contact employers, unions, and relevant third parties such as doctors, schools, private agencies, and child care providers to verify information regarding eligibility; review and verify work search efforts; examine employer payroll records; compile evidentiary documentation for agency records including adjudication and appeals; evaluate all processes and determination for adherence to policy and procedure and prepare required documentation and reports. Make appropriate referral or recommendation for corrective action when errors are discovered; attend appeal hearings to present findings on behalf of the agency; and summarize, code and report required findings/information to the U.S. Department of Labor. In the benefit payment control unit, conduct independent investigations to verify suspected fraudulent unemployment insurance claims initiated by the new hire cross match report or requests for fraud investigations from division personnel, unsolicited citizens' tips, or interstate cross match reports; compile pertinent agency information and evaluate unemployment insurance claim records; contact employers to clarify conflicting information and obtain payroll records; examine payroll records, public licenses and other relevant material/evidence to identify overpayment and possible fraud; locate and interview the claimant under investigation, representatives of government agencies, and other witnesses and prepare affidavits and reports. Analyze and evaluate testimony and evidence; calculate overpayment liability; make

determination to collect overpayment, disqualify claimants from receiving unemployment insurance benefits for a specific period of time, and/or initiate criminal prosecution; write investigative reports summarizing findings and supporting evidence; prepare case files and present to supervisor for submission for the State Attorney General for prosecution; present testimony as required in court or at administrative hearings based on evidence gathered.

**Disabled Veterans Outreach Program Specialist** | State of Nevada, Department of Employment, Training, and Rehabilitation | 10/2019 - 05/2020

- Entry level knowledge, skills, and abilities (required at time of application): Knowledge of: English grammar, spelling, punctuation, vocabulary and composition; customer service techniques; modern office practices, procedures, and equipment; telephone techniques and etiquette; record-keeping and filing methods. Skill in: operating a personal computer to enter, retrieve and process data. Ability to: read, comprehend and apply written policies and procedures to specific situations; perform basic mathematical computations including the addition, subtraction, multiplication, and division of whole numbers; compose basic business communications and document interviews; interview customers to gather accurate factual information; interact effectively with customers of diverse background; compare information and identify similarities, differences and inconsistencies; accurately copy, post or transcribe information from one source to another; explain program services, policies and requirements; establish and maintain cooperative working relationships with co-workers and the public; understand and follow verbal and written directions.

-----**Education and Training**-----

Lake Washington Technical College | Kirkland, WA | 06-2010

**High School Diploma**

Pierce College | Puyallup, WA

Environmental Science and Mathematics

Incomplete Associates of Science Degree
